EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Caldwell on 2/26/04.

The application has been amended as follows:

In claim 3 line 6, "transmit no optical signals" is changed to "are dummy fibers"

In claim 4 line 7, "transmit no optical signals" is changed to "are dummy fibers"

The following is an examiner's statement of reasons for allowance: Claims 3 and 4, as presently amended, are allowed. Prior art fails to teach or suggest modifying the fiber array of Watanabe to use jacketed dummy fibers on at least the outermost ends of the array. While JP 05-264844 teaches the use of dummy fibers, it does not suggest *jacketed* dummy fibers as claimed, and uses the fibers to stabilize an array of only two fibers, not a multi-fiber array as set forth by the applicant. Furthermore, Watanabe has alternate stabilization means, rendering dummy fibers of the type disclosed by the JP reference unnecessary. Therefore, there is not sufficient motivation to replace the outer fibers of Watanabe with jacketed dummy fibers, and the examiner's rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
